DESCRIPTION

The cable guide roller - chain is extremely versatile and can be used for pulling cables gently around corners with the least possible resistance. Thanks to its adaptability, it can be used for a wide variety of situations and corners or edges. The cable guide roller - chain can be optionally expanded with additional rollers or links. It can be secured in place with a belt or screws via the assembly opening. The lightweight and highly robust design reduces the effort required with optimum success. The high-quality, die-cast aluminium rollers with integrated ball bearings and the sturdy powder-coated steel frame guarantee a long service life.

Optimum area of application: suitable for universal use, shafts, cable trays, columns, etc.
