DESCRIPTION

Revolutionary cable pulling system - an absolute problem solver with patented penetrating power.

The RT 2008 can only be used in combination with the RUNPOGLEITER spiral MET. Due to the integrated clamping jaws and the telescopic rod, the RT 2008 ensures an incomparable spiral feed. Thanks to the straight guide, the muscle power applied can be transferred directly to the pull-in spiral.

In addition, the RUNPOGLEITER Spiral MET can be set in rotation by means of the third clamp and the ratchet handle. This enables continuous feed even with tight radii and longer distances.

As of lengths of 20 m RUNPOTEC recommends supporting this with a cordless drill.

Optimal application area: for pipe dimensions 16 mm - 32 mm
