The new basalt technology allows extreme bending radii, however, the rods retain high dimensional stability. All connections have a RUNPOTEC RTG Ø 6 mm thread, have no butt edges or thread transitions. Objects weighing up to 2.5 kg can be held with the magnet. In combination with the magnet, the ball chain enables targeted locating or guiding to wall openings. All accessories can be perfectly stored in the practical storage bag with carrying strap.

**Optimal area of application:** suspended ceilings, cable ducts, hollow walls, retro-active cabling for non-routed cables, underfloor shafts, various bushings and much more.
