WEIGHT NET	2,446 kg
MATERIAL	Special plastic
MAX. WEIGHT	150 kg static - 50 kg dynamic
EAN-CODE	9120045478044

DESCRIPTION

The CB260 trolley consists of a left and a right section with wheels, which can be attached to either side of a CB 260 box and secured using locking levers. With a stack height of four or more CB 260 boxes, this creates a fully functional trolley. The two-part wheels can also be mounted on two, three or four stacks placed next to each other.

The maximum load capacity is 150 kg when used on level ground (static). When transporting over stairs or steps, the transport load is limited to 50 kg (dynamic).

Static: smooth movement on level ground

Dynamic: when additional forces are applied – for example, when going up and down stairs.

Fold-out front supports are integrated into both wheels. These support stability with taller stacks (top-heavy) and prevent the CB 260 boxes from tipping forward.

In addition, brief assembly instructions and a video are available, showing the assembly process step by step.

Area of application: Transport tasks in everyday work, transport on stairs and applications in warehouse environments such as cable or material storage.

Scope of supply: 1 x Trolley attachment left, 1 x Trolley attachment right

ADVANTAGES

- Accessories for CB260 Cable Box
- Variable use for different stack numbers
- Secure fastening via side locking levers
- Fold-out front supports to prevent tipping when top-heavy
- Load capacity: 150 kg static and 50 kg dynamic (stairs)
- Suitable for transport, stair use, and storage areas
