DESCRIPTION

The RP5 is a cable pulling tool without meter counter. The triple-twisted special plastic tape with a Ø 5.5 mm has an even better shearing effect than the 3 mm fiberglass rod; the frictional resistance is only half the normal value due to spot contact. The RG7 guiding head with swivel (pressed on both sides) allows overcoming tight radii (bending radius 15 mm). It is equipped with the new glide back protection (only stops the RG7 guiding head), which prevents the cable pulling strap from slipping back accidentally. The total breaking load of 270 kg refers to the entire pulling system. Labour- and time-consuming repair work is no longer necessary, as this cable pulling system is virtually breakage-free. **Cable pulling loop with protective cap and hook.** Easy attachment of cables to the loop. The protective cap allows cables with plugs to be pulled through pipes or other situations while protecting the plug. The hook makes it possible to fasten cable pulling loops to all products with RG RUNPOGLIDER. Also ideal for fixing or pulling several cables together.

Optimal area of application: for pipe inner diameter 9 - 32 mm and from 14 mm inner diameter and non-routed cables.

Scope of supply: 1 x RP5 cable pulling tape Ø 5,5 mm without meter counter in a plastic box, length: 30 m, including 2 x RG7 RUNPOGLEITER with swivel, Cable pulling loop with hook set of 4: 1 x protective cap outer Ø 14 mm, 1 x protective cap outer Ø 17 mm, 1 x protective cap outer Ø 23 mm, 1 x protective cap outer Ø 30 mm

ADVANTAGES

- Triple twisted special plastic tape Ø 5,5 mm
- 2 x RG7 - Guiding head with swivel Ø 7 mm
- Glide back protection (only stops the RG7 guiding head)
