DESCRIPTION

RUNPOTEC polyester pull ropes on drums are ideal for horizontal cable pulling when used in combination with the RUNPOTEC CW 800 E capstan winch. RUNPOTEC recommends using the swivel with twist compensation (item no. 10176) for horizontal cable pulling. This connects the pull rope to the pulling sleeve and compensates for twisting between the cable and the pull rope – ensuring gentle and efficient cable pulling. Splice-in loops at the start and end of the rope enable simple and safe handling.

Safety note: Not suitable for vertical cable pulling. Must not be used for carrying or lifting loads or persons.

Optimal application: Horizontal cable pulling in combination with the CW 800 E capstan winch

Scope of supply: 1 x Pulling rope Ø 12 mm on drum, length: 150 m

ADVANTAGES

- Spliced loops at the start and end of the rope
- Low rope elongation
- Top price/performance

INFORMATION**Accessories:****Connection swirl**

incl. swivel
