New basalt technology enables extreme bending radii, yet the rods remain dimensionally stable. No rusting – thanks to stainless steel connections and no sharp edges. The standardised RUNPOTEC RTG Ø 6 mm thread enables a wide variety of combinations. All accessories can be screwed on without additional adapters. Ideally suited for use in combination with the RC2 or RC3 inspection camera. Extreme bending radius of 200 mm.

Optimal area of application: suspended ceilings, cable ducts, cavity walls, retrofitting of cables in non-guided lines, underfloor ducts, feed-throughs, etc.

Scope of supply: 2 x RUNPOSTICKS black Ø 5,5 mm - length 410 mm each
